SAFETY

CLARITY | CONFIDENCE | COMPLIANCE

Plan

Planning in business is essential to success. We help you understand where you are now and where you want to be in the future.

To create the bespoke health and safety plan we:

- Complete a gap analysis - a review of existing arrangements to find your strengths and weaknesses.
- Carry out risk profiling - establishing your key health and safety risks and the effectiveness of existing controls.
- Review your current safety performance - what has worked well so far and what hasn't.
- Help you set goals and objectives - what does good look like and how are we going to get there.

We partner with your business to create a plan that provides direction, clarity and long term gains.

Systems & Structure

We help you navigate complexity & give clarity with a user-friendly system that provides a solid foundation to creating a safe working environment.

Our health and safety system includes:

- A health and safety policy statement
- A bespoke health and safety plan
- Aims and objectives
- Organisational Roles and Responsibilities
- Health and Safety Standards
- Communication
- Monitoring and Performance Measurement

"A documented health and safety policy is a legal requirement for businesses with 5 or more employees."

We can help you create, implement or review your health and safety management system.

Confidence and peace of mind that your health and safety arrangements and controls are working. It's not just about identifying problems, we help you understand them and find the solutions needed.

- Periodic site inspections - designed to look at how work is being completed and if controls are effective and applied.
- Annual health and safety review - a more in-depth review of your arrangements to determine the effectiveness of application, conformance to legislation and industry best practise.
- Risk specific site inspections - designed to look at how you manage and control specific risks.

Assurance

Regular health and safety inspections and audits are widely recognised as best practice for businesses.

Support

When things don't quite go to plan it's nice to know there is someone available to provide support and that figurative 'arm around the shoulder'.

- Access to competent H&S advice via telephone, email or virtually.
- Health and safety training - bespoke workshops to help raise awareness and upskill your employees.
- Health and safety campaigns
- Updates on legislation changes relevant to your organisation.
- Accident and incidents - we support you through the event learning process.

We ensure you meet your legal requirements and have access to competent health and safety advice when you need it.

"Staying ahead of new emerging risks can be challenging and daunting – we're here to help."
